

Loudoun County has made recent changes, involving Building Permits and Zoning Requirements.

Approval of a CountrySide application does not relieve the Owner of the responsibility to obtain all the necessary approvals and permits required by Loudoun County, the Commonwealth of Virginia and other agencies having jurisdiction over the project or improvement. **The Applicant should contact Loudoun County before beginning any work to determine the necessary approvals and/or permits required.**

Related Information from Loudoun County, VA

Building Permits

For information about building permits, contact the Department of Building and Development at 703-777-0220 (V/TTY). Information also is available online, including a list of required permits, information about how building permits are issued, and guides to building decks and finishing basements.

Before beginning residential or commercial construction in Loudoun County, you must obtain permits from the appropriate county agencies and, if applicable, the appropriate agencies of the incorporated towns.

Zoning Requirements

It is the applicant's responsibility to check with the Office of Mapping and Geographic Information, Department of Building and Development, and any other county departments or agencies to determine if there are any building restrictions on proposed building lot prior to applying for permits.
